

Hottest Thing

Usher

I've been looking at you
Turning brothers down, song after song
Well, it's time for me to holla now
Your body is calling, don't fight it
Ooh I like it You're dancing all alone
What's that all about? You're so fine
But it's time for me to call you out
Watch out, I'll straight run up on you
Girl I want you You're the hottest thing in the club tonight
Having visions of making love tonight
With you constantly to the break of dawn
We can shake the spot if you say it's on, oh baby Dancing so close, got me up like whoa
We're doing the most is living with you possible?
Your body is saying you want to
And I want you, oh baby More than you know sugar if only for one night
I'll make you feel like you've been to paradise
It's all up to you, tell me something baby
I know one thing You're the hottest thing in the club tonight
Having visions of making love tonight
With you constantly to the break of dawn
We can shake the spot if you say it's on You're the hottest thing in the club tonight
Having visions of making love tonight
With you constantly to the break of dawn
We can shake the spot if you say it's on Baby tell me, what's on your mind?
Do you think that I'm being too forward
Oh baby by coming at you, this way
I can't help myself You're the hottest thing in the club tonight
Having visions of making love tonight
With you constantly to the break of dawn
We can shake the spot if you say it's on You're the hottest thing in the club tonight
Visions of making love tonight
With you constantly to the break of dawn
We can shake the spot if you say it's on You're the hottest thing, club tonight
Visions of making love tonight
With you constantly, break of dawn
Shake the spot
