Nocturnal

Tiger Army

you have ignored us.
we've become nocturnal.
pushed out of the day into the night.
we are invisible but we can see you.
night vision, don't need the light.
we came from nowhere, but we're not nothing.
you better beware. the nocturnal in shadows dwell.
gone... all that's come before.
we are the nocturnal.
like creatures at the bottom of the sea if they could rise.
our faces poison pale.
crawl evolution's hellish trail and wait for the night to arrive...
