All Over Now

Alice Russell

The birds have stopped their song, they know its time to go
The trees have dropped their leaves on the silent roads
The boys put down their arrows and the bows and the
Clouds have moved aside for the sun to dim its glow

the river dried up & the oceans with the sea
The stars put out their lights and closed the galaxy
They shut the mountains & the valleys on the way
They packed up Africa, Brazil, Bombay, cos its

final
You should go
But its fine now
They all know

its over now

and now the west winds are so slow they hardly blow
And the chill outsides too cold even for snow
The houses packed up the streets left long ago
From here to vience beach, milan, & the congo

take a while to stand outside there'll be no rain
I don't know if I can start all this again
Will the world return to me intime the same
From here to italy, norway & spain cos its

final
You should go
But its fine now
They all know
