Fallen Star

Rahim Quazi

We're so in love
We did all the drugs
Fell down in clubs
Our hearts just raised up
We kissed in the dark
In the back of your car
We cuddled in the park
You shine like Noah's Ark
Pain inside
Crashes and glides
I can't decide
Your heart was my guide
It's been to long
You're my perfect drug
But the worlds all wrong
I hope you sing along
Wherever you are
You'll be my star
Near or far
You'll always be my one
(2X)
Kiss me goodnight
You say it's all right
This can't be goodbye
My heart just dies
Earth is dying
Kids are crying
The plans we've made
Just rot away
Your angel wings
Will shine on me
Like the blood on the strings
My heart just falls in seems

You fall in front of me
As we cast away in the sea
I'll be your dream machine
A life full of luxaries
You died in that crash site

Just like our love life
Blinded by headlights
We fell in front of bright lights
Like Jack and Sally
On top of Death Valley
Down below in Soulthern Cali
We lived out our grand finale
Wherever you are
You've stolen my heart
Near or far
You'll always be my star
So, kiss me goodnight
Say its all right
This can't be goodbye
My heart just dies
Earth is dying
Kids are crying
The plans we made
Just rot away
Wherever you are
You've stolen my heart
Near or far
You'll always be my star
Like Jack and Sally
On top of Death Valley
Down below in Soulthern Cali
We lived out our grand finale
