

Fallen Star

Rahim Quazi

We're so in love
We did all the drugs
Fell down in clubs
Our hearts just raised up
We kissed in the dark
In the back of your car
We cuddled in the park
You shine like Noah's Ark
Pain inside
Crashes and glides
I can't decide
Your heart was my guide
It's been to long
You're my perfect drug
But the worlds all wrong
I hope you sing along
Wherever you are
You'll be my star
Near or far
You'll always be my one
(2X)
Kiss me goodnight
You say it's all right
This can't be goodbye
My heart just dies
Earth is dying
Kids are crying
The plans we've made
Just rot away
Your angel wings
Will shine on me
Like the blood on the strings
My heart just falls in seems
You fall in front of me
As we cast away in the sea
I'll be your dream machine
A life full of luxuries
You died in that crash site

Just like our love life
Blinded by headlights
We fell in front of bright lights
 Like Jack and Sally
 On top of Death Valley
Down below in Soulthern Cali
We lived out our grand finale
 Wherever you are
 You've stolen my heart
 Near or far
 You'll always be my star
 So, kiss me goodnight
 Say its all right
 This can't be goodbye
 My heart just dies
 Earth is dying
 Kids are crying
 The plans we made
 Just rot away
 Wherever you are
 You've stolen my heart
 Near or far
 You'll always be my star
 Like Jack and Sally
 On top of Death Valley
Down below in Soulthern Cali
We lived out our grand finale
