Don't Let Me Drag You Down

Sarah Bettens

Sometimes it takes some falling down
To get back on your feet
I often think the things I want
The things I really needI noticed yesterday that lately I
Haven't noticed much
Colors change and people change
And I am busy handling the remoteWhen you see this I don't let me drag you down
When you feel this way don't let me drag you down
I need you to turn me upside downIn every room, in every house
Someone's always waiting to be heard
Sitting on my big behind
I am hardly rescuing the worldWhen you see this I don't let me drag you down
When you feel this way don't let me drag you down
I need you to turn me upside downDon't let me hide
Behind the question, why?When you see this I don't let me drag you down
When you feel this way don't let me drag you down
I need you to turn me upside down
