# Dancing For Your Life

## Massari

She'll have you dancing for your life
She'll make you a slave all through the night
She'll have you dancing for your life
She'll make you, make you
I wanna know
Am I really feeling something
Cause i'm wondering if it's nothing at all
Can't let it go
Like to think that i've been running after something that's been here all along
There's something about her eyes that I know, that I love
Find a way just to make her mine
And I know i'm gonna, i'm gonna pay her price
She'll have you dancing for your life
She'll make you a slave all through the night
She'll have you dancing for your life
She'll make you a slave all through the night
She'll have you dancing for your life
She'll make you a slave all through the night
She'll have you dancing for your life
She'll make you, make you, make you
Can't let it show
But I feel my heart is melting if she felt it hope she won't let me go
I should have known

By the way that she was dancing all around me like she's done this before
There's something about her eyes that I know, that I love
Find a way just to make her mine
And I know i'm gonna, i'm gonna pay her price
She'll have you dancing for your life
She'll make you a slave all through the night
She'll have you dancing for your life
She'll make you a slave all through the night
She'll have you dancing for your life
She'll make you a slave all through the night
She'll have you dancing for your life
Could it be the music
Could it be the night
Like a supernova
It's burning in her eyes

She'll have you dancing for your life
She'll have you dancing for your life
She'll make you a slave all through the night
She'll have you dancing for your life
She'll make you a slave all through the night
She'll have you dancing for your life
She'll make you, make you
