Spitting

Rocket from the Crypt

Lift me to death before the last 30 years
Can't get Hanoi Jane off my back
Black it out but I keep all the lights on
I'm more fucked up than thatSpitting harder at my own shadow
Punji sticks me harder, it's an overload
Wrap me in your sin and numb me to the world
I keep spitting harder, spitting harder, spitting it upYeah, it's a fact that monkeys always scream
When belt tied to a tree
Hold my breath and cherish everyday
And savor every painSpitting harder at my own shadow
Punji sticks me harder, it's an overload
Wrap me in your sin and numb me to the world
I keep spitting harder, spitting harder, spitting it up
