Hinterland

Cubanate

What have you come here for
Do you want your blood money
What have you come here for
Do you want your...
What have you come here for
Do you want to cut some flesh
What have you come here for
Do you want to...
Save your breath for someone else
I stuck it out to the bitter end
If I could get inside your
If I could get inside your head
If I could get inside your
If I could get inside your head
When you talk to me, I don't believe it
Whatever you want from me, I can't give it
The rain comes down, the radio plays some hits
You want to talk to me all night, and that's just... bullshit
If I could get inside your
If I could get inside your head
If I could get inside your
If I could get inside your head
If I could get inside your head
If I could get inside your
If I could get inside your head
If I could get inside your
If I could get inside your head
I stuck it out to the bitter end
If I could get inside your
If I could get inside your head
If I could get inside your
If I could get inside your head
If I could get inside your
If I could get inside your head
If I could get inside your head
