# From the Window

## Rebelution

From the window,
I wait for a sign, and wait through the night,
I'm alone, but I don't mind,
From the get go,
I sing and I cry, and try to divide my thoughts and apply,
When the wind blows,
Ahhhh,
Give me a sign, now give me comfort, love, and supply me with,
Everything I need and less I want,
I see the weather changing faster than I thoughtWill we all fall like we did when it rained?
The pressure rises with the fame,
And time after time we all fall down,
Only to rise up, to rise up once againDon't stop, keep working again, don't you quit, don't you ever give in,
No doubt, just to let you know I'm a friend, till the end, till the end, till the end,
Don't stop, keep working again, don't you quit, don't you ever give in,
No doubt, just to let you know I'm a friend, till the end till the end till the end
