For Blue Skies

Strays Don't Sleep

Its been a long year
Since we last spoke
Hows your halo?
Just between you and I
You and me and the satellites
I never believed you
I only wanted to
Before all of this
What did I miss?
Do you ever get homesick?
I cant get used to it
I cant get used to it
Ill never get used to it
Ill never get used to itIm under that night
Im under those same stars
Were in a red car
You asleep at my side
Going in and out of the headlights
Could I have saved you?
Would thatve betrayed you?
I wanna burn this film
You alone with those pills
What you couldnt do I will
I forgive you
Ill forgive you
Ill forgive you
I forgive youFor blue, blue skies
For blue, blue skies
For blue, blue skies
For blue, blue skies [x7]Ill forgive you [x16]
