

# Big Quiet

## The Dead Ships

Through the static gammons  
we could pull you out from  
whatever swallowed you  
don't get lost in the sound  
all the withdrawal white noise  
we know the symptoms  
if you get scared on the other side  
you can come back home

If things get too loud  
and you're over it  
you can come back to life  
and return to the big quiet

We took the same shift  
shoveling dirt  
just to see which one of us  
could get the other fired first  
no i still don't know who won  
i'm stuck digging up ground  
have to watch it cover you  
and get lost in the sound

If things get too loud  
and you're over it  
you can come back to life  
just like i did  
and return to the big quiet

Wall of noises  
split up into different voices  
calling all kids  
back to when they made their choices  
when we repeat this or should the other side decide to quit  
or you're over it  
can i just come with  
return to the big quiet
