

Always Have Always Will

[Paul Carrack](#)

If you're wondering if your love
Will stand the test of time
I'm here to tell you I can put your mind at ease
Ain't nothing in the whole wide world
That could ever make me leave How could I ever walk away
Darlin', I need your love each and every day Always have, always will
If you should ask me, do I love you still?
Without shame, without blame
I always have and always will
I always have and always will I remember there were times
When my heart could not conceive
Something so beautiful could happen in this life
A precious gift to me worth and sacrifice
There is no doubt or mystery
It's obvious that you mean everything to me Always have, always will It was almost like your heart called out my
name
I was helpless from the start
I knew right there and then I'd never be the same
Never never
I'd never be the same
