

# Mystery Lady

Paul Stride

Hey there mystery lady can I spend the night with you  
Can I have your number I'll be anything you want me to  
We ought to get something started  
Ooh I can tell so very well  
He has left you brokenhearted  
It's time to start mending you heart

Darling when the nights are cold and lonely, I will keep you warm

You need to be loved by me, mystery lady  
You need to be loved by me, mystery lady

Hey there mystery lady love is but a kiss away  
And you can bet you bottom dollar  
I'll do anything to make you stay  
So lets get something started  
Why hesitate oh I can't wait  
There is something that you're missing  
The fire in your eyes, you can't disguise  
Darling when the nights are cold and lonely, I will keep you warm

You need to be loved by me mystery lady  
You need to be loved by me mystery lady  
You need to be loved by me mystery lady  
Girl I'll come knocking at your door  
Caught in your magic just look what you've started

We ought to get something started oh I can tell so very well  
That he's left you broken hearted its time to start mending your heart  
So darling when the nights are cold and lonely I will keep you warm
