

The Pain

NYVES

I believe you
And that's the trouble
Tried to leave you
See my struggle
I'm dying to feel
Trying to find
All of the real
The last of my kind
Relax, recall
Embrace for the fall

[So what if all aloud we start to play](10250283)
We have to start the fire all the same
We're not waiting for permission
We have to ease the pain

Hard to see through
The endless room
Tried to reach you
To see you through
So where is the call
Where is the light
Show me the road
Give me the time
Relax, recall
Embrace for the fall

So what if all aloud we start to play
We have to start the fire all the same
We're not waiting for permission
We have to ease the pain

(We Have to ease the pain)

So what if all aloud we start to play
We have to start the fire all the same
We're not waiting for permission
We have to ease the pain

So what if all aloud we start to play

We have to start the fire all the same
We're not waiting for permission
We have to ease the pain
