Cosmos (Outer Space)

Tatu

Games we don't want to play, same winner everyday
Kill for the second best, feel no more, feel no less
We have our minutes cut, we lose our feelings but
That's what the movies show, this is where stories goStars we don't want to reach, scars we don't want to stitch
Go where we haven't been, fly away, time machine
Clouds we will chase him out, crowds we will face them down
This is our secret place, outer space, outer spaceOur home forever is outer space
Black stars and endless seas, outer space
New hope, new destinies, outer space
Forever we'll be in outer space, outer spaceGround we don't want to feel, found what they didn't steal
Time, we were really lost, bridges burnt, fingers crossed
We, shall we ever be free with no guarantee
Life on another plane, same before, same againGo where you want to go, so no one ever knows
Only what we decide, is it gone, has it died
Dry every tear in my eye, you can tell me why
This is our secret place, outer space, outer spaceOur home forever is, outer space
Black stars and endless seas, outer space
New hope, new destinies, outer space
Forever we'll be in outer space, outer spaceOuter space is where we get together
And this place we're meant to be
Stars are dancing and the time is fading
Dead forever, you and me, you and meRacing stars and common moons are planets
In the Cosmos, we are free
There's no atmosphere and no obsessions
It'll always be, it'll always beOur home forever is, outer space
Black stars and endless seas, outer space
New hope, new destinies, outer space
Forever we'll be in outer space, outer spaceOur home forever is, outer space
Black stars and endless seas, outer space
New hope, new destinies, outer space
Forever we'll be in outer space, outer space
