

The Way We Touch

We Are Twin

[Verse 1] I've got my hands around your neck, my lips up on your chest

You love it how I need you boy

Oh dare I say the rest

The people they can stare, I don't mind it, I don't care

As long as we together, we got love extraordinaire

When we were by the ocean and you turned to me to say

Girl don't you ever go and try to change no matter what

Anybody says

If you could be my best friend, then I would build a home

Where the both of us can live alone, where you can grow into your own [Chorus] You'd be the best that I ever
hoped for

I love it how I can't resist the way you are

The way we touch

If we are a match, I'd give you everything I longed for

I love it how I can't resist the way you are

The way we touch [Verse 2] You got me on a hook, from the moment you said baby

If I faint from overheating, call the marshall Mr. Davy

I'm running out of breath, I feel it in my head

I can't go home without you boy

Let's hit the road to live!

If you would be my hero, then I would be your girl

You could have me anytime you want, even early in the morning sun

I only have my Chevy and the keys to my heart

Oh take me for a ride to the moon

I forget the world when I'm with you!
