Borderline with My Atoms

Hiatus Kaiyote

Melt into the other world
Melt, melt
He saw my eyes turn gold and reptile
I dream tonight bare and baptized
Bear and baptized
Coyote bones flex the muscle of animal spirit old
A bond so simple

Borderline with my, my atoms
Borderline with my, my atoms
Borderline with my, my atoms
Borderline, in time, it alkalines

After the coal has settled deep beneath ash resting
Quiet as silk the remedy tampers the willing
A ripe submergence of the highest order, no borders
