

What Are We Gonna Do

Dru Hill

Whispers passed in silence
Two lovers passing in the night
A love that's left and hopeless
That can never survive
What are we gonna do?
What are they gonna say?
Where are we gonna go
When they find out?
What are we gonna do?
What are they gonna say?
Where are we gonna go
When they find out?
Sing your song, sing your song, sing your song
Really don't know you well
Got to get to know me too
So see, we can make this work
Through your friends won't approve
See, we can't let them know
Exactly what's going on
'Cuz they won't understand
What we have between us
What are we gonna do?
What are they gonna say?
Where are we gonna go
When they find out?
What are we gonna do?
What are they gonna say?
Where are we gonna go
When they find out?
Woody, woody, woody, woody
I know we may be rushing
There's no time to think it through
'Cuz when love overcomes your heart
There's nothing you can do
Misery loves company
By now you should know
People always have advice about being together
When they're all alone
I cry, I cry, I cry, late at night baby

Inside, inside my heart babe
I was all alone
Don't you let no god damn body come near
And tear our love apart
'Cuz I love you girl
You're all my world
So what are we gonna do
What are we gonna do?
I feel so afraid, babe
Feel like a baby
Just hold me darling
And let me know
I need to know
I've got to know
What are we, oh baby
What are we gonna do?
What are they gonna say?
Where are we gonna go
When they find out?
What are we gonna do?
What are they gonna say?
Where are we gonna go
When they find out?
What are we gonna do?
What are they gonna say?
Where are we gonna go
When they find out?
What are we gonna do?
What are they gonna say?
Where are we gonna go
When they find out?
What are we gonna do?
Oh well, well, well, well, well, well
Oh baby, well, well, well, well
