

She Left Me On Friday

Shed Seven

She left me on friday and ruined my weekend
She thinks we're still best friends she thinks we're still alright
She's playing her mind games got into the fast lane
Drove off to some bright lights
To find out if all the places that shine are anything like mine
no no
She left me
with no hope it's all gone up in smoke
She didn't invite me
rode off with a donkey
To find out if all the places that shine are anything like mine
To find out if all the style she's got s'gonna push her to the top
She left me on friday and put me in limbo
She's stolen my ego and now it's a no go go go go
She left me with no hope it's all gone up in smoke
she didn't
invite me
To find if all the places that shine are anything like mine
To find out if all the style she's got s'gonna push her to the top
To find out if all the fridays you choose are where you'll still lose
She left me on friday and ruined my weekend
She thinks we're still best friends she thinks we're still alright
To find if all the places that shine are anything like mine
To find out if all the fridays that come are gonna make you feel welcome
To find out if all the style you've got s'gonna push you to the top
To find out if all the fridays you'll choose are where you'll still lose
