# Collide

## Durand Bernarr

I've been hanging on by my urethra trying not to give it up
But the longer I deny the harder it is getting by
Esoteric photos, ever-erupting volcano
Lord, give me the strength to keep the lava from you, baby

What I have in mind to share
Your brain won't comprehend
But when our bodies finally collide
You'll fully understand

If I lay hands once again
My limbs will imitate London Bridge
I've been struggling to contain
That I already said your name
But see my mind is that 1% of cells
That the sanitizer didn't kill
Please forgive, I said please forgive
Harm wasn't meant

What I have in mind to share
Your brain won't comprehend
But when our bodies finally collide
You'll fully understand

What I have in mind to share
Your brain won't comprehend
But when our bodies finally collide
You'll fully understand

Woah, What I have in mind to share
Your brain won't comprehend
But when our bodies finally collide
You'll fully understand

What I have in mind to share
Your brain won't comprehend
But when our bodies finally collide
You'll fully understand
