Xenophobia

Denver Harbor

One nation under hatred
When will we ever learn
Set fire to the station
Then count the seconds, every bridge is gonna burnTheres no denying greatness
Say it, you should turn the other way again
You've got your problem and it (goes around comes around again)
One more manipulation (goes around comes around again)You cast the darkest shadow
To hell with circumstance
Genius is hard to swallow
Forget the future, there can be no second chanceTheres no denying greatness
Say it, you should turn the other way again
You've got your problem and it (goes around comes around again)
One more manipulation (goes around comes around again)
And even if the powers p-p-pay (goes around comes around again)
Theres always more left to take.Dancing with the devil now...
And you want what you dont have, and you bleed with a vengeance
And you fight for greed or for nothing at allTheres no denying greatness
Say it, you should turn the other way again
You've got your problem and it (goes around comes around again)
One more manipulation (goes around comes around again)
And even if the powers p-p-pay (goes around comes around again)
Theres always more left to take, take, take, goes around, comes around again.
