

# Secret

## Haste the Day

(All your secrets)  
(All your disillusion)  
(How far down will you go?)  
(Hide in silence)  
(Break communication)  
(How far down will you go?)(Hide)  
You've been miles away  
(Build your walls)  
With all the wars you wage  
The time has come  
To let it heal, let it heal  
Hide  
You've been miles awayBuild your walls up  
While you keep me in the dark  
Turn the lights out  
AloneAll your secrets  
All your disillusion  
I will never let you go(Hide)  
You've been miles away  
(Build your walls)  
With all the wars you wage  
The time has come  
To let it heal, let it heal  
(Hide)  
You've been miles awayYou were never who you said you'd be  
Always hidden behind each lie  
Buried deep within your secrets, and  
With your secrets you will die  
I wanna know  
Where did you go?  
Buried deep within your secrets, and  
With your secrets you will dieConfront what you're hiding  
Confront what you're hiding  
Confront what you're hiding  
Confront  
Stop hidingDespite your reasons  
Despite your evolution  
I will never let you goConfront your secrets  
Confront your disillusion

Confront your secrets  
Confront your disillusion
