

Object

The Cure

You know you turn me on
Eyes so wide and legs so long
But don't try to talk to me
I won't listen to your lies
You're just an object in my eyes
You're just an object in my eyes Sophisticated smile
You seduce in such fine style
But don't try to fool me
Because I can see through your disguise
You're just an object in my eyes
You're just an object in my eyes But I don't mind
Just don't care
I've got no objection
To you touching me Object, object
Object, object
Object, object
Object, object You know just what to do
Lick your lips and I want you
But don't try to hold me
Because I don't want any ties
You're just an object in my eyes
You're just an object in my eyes But I don't mind
Now, I just don't care
I've got no objections
To you touching me You're just an object, object
You're just an object, object
You're just an object, object
You're just an object, object Object, object
Object, object
You're just an object, object
You're just an object
