

Mars

Sir Simon Rattle

Earth to your brain
Yo, yo, yo, yo
Yo, yo, Houston I think we have a problem
Yo, yo, I think we have a problem
Yo, yo, we have a problem
Yo, yo
Days, you know those days
When everyone seems to aggravate you
Unfazed, fucked up ways
Don't try to ignore, you know that it's true
See you say to yourself that you really don't wanna deal
And this day to day action on Earth just don't appeal
You know how hard you try
You've been known to take so much
They shoot at you cause you're fine
Bite the bullet I know that it sucks
If security's thin then faith will pull you through
If you still angry follow me
And do what I do
Do you hear what I'm talking 'bout?
Do you hear we can conquer the world?
Got this whole world running from
This love between a boy and a girl
They're afraid of this chemistry
Plus the speed of light of laser guns
They go
To the light in every one
There you want some friends
Seems like everybody has friends
Depends on what you call friends
You don't really care you just want one
It's a person full of feelings but nobody's there
But you have to ask yourself if they were
Would they really care?
They do bullshit some times
They do the things that you've done
They're people just like you
But tell me do you want one
98 percent of faith won't follow through

Don't you know real magic comes from the other two?

Do you hear what I'm talking 'bout?

Do you hear we can conquer the world?

Got this whole world running from

This love between a boy and a girl

They're afraid of this chemistry

Plus the speed of light of laser guns

They go

To the light in every one

Do you hear what I'm talking 'bout?

Do you hear we can conquer the world?

Got this whole world running from

This love between a boy and a girl

They're afraid of this chemistry

Plus the speed of light of laser guns

They go

To the light in every one

It was last week we were watching TV

My boyfriend wanted to watch channel three

Then he started to freak

The news flash came on then

So I said hey, my popcorn's burning

Hey, why is the channel turning?

Hey, that was NASA what did they want

Hey, yo just pass the blunt

I was so high that I didn't realize what they said

Plus my eye vision fried

If it's not then it's messing with my head

Hey, you can't be serious

Hey, but I need my contacts

Hey, float and spin

Hey, so I turned and I said, shit

Do you hear what they talking 'bout?

About to send your black ass to Mars

That's exactly what I'm talkin' bout

Money, science, space, and mars

Till someday you got that million

Just because you've been hanging with stars

Wake up, wake up, wake up, wake up

And send your black ass to Mars

Do you hear what I'm talking 'bout?

Do you hear we can conquer the world?

Got this whole world running from

This love between a boy and a girl

They're afraid of this chemistry
Plus the speed of light of laser guns
They go *laser sounds*
To the light in every one
Yo, yo, yo
Yo, nigga-nigga, yo
Yo
Yo, Star Track, yo, yo (ha-ha)
Yo, Kelis, yo, Neptunes, yo
Earth to your brain, yo
UFO, who knows?
Earth to your brain
What is it already closed?
You're fucked
