

Invisible

Annie

The night is long until the dawn
Dodge your number, I speak to the tune
Stay on hold till lips turn cold
Will you call me later?
Will I catch you later?
I was looking for you, but youre never home
Hours and hours, stay by day
You never sided, you never told
What I feel, what I know, what I hear is over!
Your loves so cold
You raised me up and let me fall
You seek the truth,
For some become invisible.
Girl you know me, I know you
I make mistakes, that its true
If you cant forgive me, let me go
Im the devil in the dark
I do what Im told, talk to talk
Hope the demons walk the walk
My hands are dirtier, hell not!
What I feel, what I know, what I hear
Its over!
Your loves so cold
You raised me up and let me fall
You seek the truth,
For some become invisible.
With all this loss
You took my heart to
But thats your heart
And that becomes invisible
Its the end,
It is over!
Its the end,

It is over!

Its the end,

It is over!

When life goes on, Im without you

You move to town and thats a rule

Winters cold and so are you!

Close the door, say no more

I was shocked, feel no loss

Take it or leave it

Feel the rush now without you

I was what we know is always over!
