

I Guess I'll Take Care

[Midlake](#)

I guess I'll take care
Of my heart and brain and hair
With a soda for the ride
Seems to help me all the time
Leaving there from you I want you all the time
You want me too
I want you all the time
You want me too I guess I'll take care
The next time that I'm there
I'll serve breakfast in bed
Have to make sure you're well-fed You're a movie star
You're a movie star
You're a movie star
You're a movie star
