

# Guiding Light

## Little River Band

I've changed my mind  
Things don't really seem so bad this time  
I've learned my lesson  
Though it hurt my pride So on we go, crazy rockin', rollin' rodeo  
I need you more now than I did before  
Changing my point of view  
Is teaching me something new Guiding light I need you here tonight  
I'm walking in the dark alone, close the door  
A thousand years or more  
Until my guiding light comes shining through Morning star how you found me wandering near and far  
This wounded memory wears like a scar  
They all say time will heal  
But they don't know how I feel Guiding light I need you here tonight  
I'm walking in the dark alone, close the door  
A thousand years or more  
Until my guiding light comes shining through Comes shining through, shining through  
Comes shining through
