The Three-Dimensional Shadow

Scar Symmetry

Behold this world that gave birth to you
Its secret nature out of sight
Imprisoned by what we think we know
In life long dreams we hold for realKnown a drop, unknown an ocean
Feeling astray
We mankind strangers in our own world
Riding the waves we areNow it's time to turn the page, we've waited for so long
Waiting for the dawn to come when we control the sunAnd now this world that gave birth to you
Will see that you're the source of lightKnown a drop, unknown an ocean
Feeling astray
We mankind strangers in our own world
Riding the waves we areNow it's time to go beyond, revealing the concealed
Leaving all the things we know to view the paths unknownWorld, we've been waiting for so long
Now turn the pageKnown a drop, unknown an ocean
Feeling astray
We mankind strangers in our own world
Riding the waves we areNow it's time to turn the page, we've waited for so long
Waiting for the dawn to come when we control the sun
Now it's time to go beyond, revealing the concealed
Leaving all the things we know to view the paths unknown
