

Beyond and Back

Necrophagia

suicide (no will to live)
so called afterlife (does it exist)
depression, aggression locked up inside
is life worth living (it's time to decide) your demise, a razor's touch
were things really that fucked burn as you cease to exist
you leave your body a vapor of mist
departure enter the unknown
horrified as the journey continues
relentless pleas of agony
visions of grotesques deformities
remembrance of forgotten memories
to dwell and rot in purgatory
I shall never rest peacefully
in this world of never ending insanity forever my soul to be condemned
misery and suffering (it will never end)
the shadow of flames by
restored to flesh and bone
which mortal birth bestowed upon me
