Out of Orbit

Caesar

Take us out of orbit
Something's not in order
We will take a close look
Closer look ourselvesWhat is going on, sir?
Will we find our answer
Not without a question
Not without a doubtCan you see the sun is
Not where we have left it
Now we really lost it
Lost in space againYou know this dreamscape's
Giving me a headache
Now's the time to panic
Someone save our soulsI could see it from the first day we left earth
That you were different from everyone else
You don't feel the same, can't stay this way
We'll take you out right nowThis night
is a long night
And there's nothing I can say
that can make it go awayThis night (can you see the sun is coming up)
is a long night (at this time that the night is fading)
And there's nothing I can say (can you see the sun is coming up)
that can make it go away (at this time that the night is fading)(Ahah)
It is not over yet
