

# Far from Heaven

## StarBenders

Meet me at the place, at the place where I met you  
Looking for a face in the crowd I can cling to  
Eyes like Crystal, silver light  
I want your love dripping from my tongue all through the night  
Fall from heaven when we're together  
Breathe into me  
Far from heaven when we're together  
Breathe into me, right now  
Looking for a beat, for a beat we can be true to  
Caught up in a dream, another world gotta break through  
Eyes like crystal, silver light  
I want your love dripping from my tongue all through the night  
I fall from heaven when we're together  
Breathe into me  
Far from heaven when we're together  
Breathe into me, right now
