

Erased (feat. Seb Kedziora)

Phil Ber

[Verse]

you
enter the room
it's dÃ©jÃ© vu
have we met before? vague thoughts
of someone I knew
then trouble brewed
and away you flew was it some kind of relationship
must have been a tiny blip [Chorus]
you have been erased
you have been erased
from memory
time and space you have been erased
where thoughts might have lived
are empty windows to an empty place why remember so much pain?
isn't it better to dance in the rain why remember so much pain
ignorance is bliss, let it slip [Verse]
you...ask me again
are we still friends
but I have no recollection of who we were
it's all a blur
a side effect of the cure was it some kind of relationship
guess it was a tiny blip [Chorus]
you have been erased
you have been erased
from memory
time and space you have been erased
where thoughts might have lived
are empty windows to an empty place why remember so much pain?
isn't it better to dance in the rain why remember so much pain
ignorance is bliss, let it slip [Bridge]
when you see me
just walk on by if you hear me
I'm a stranger
there's no disguise [Chorus]
you have been erased
you have been erased
from memory
time and space you have been erased

I can't ever replace
the moments lost and laid to waste why remember so much pain?
isn't it better to dance in the rain why remember so much pain
ignorance is bliss, let it slip [Finale]
you have been erased
you have been erased
from memory, time and space you have been erased
you have been erased
vanished without a trace you have been erased
you have been erased
moments lost and laid to waste
