Caste System

Rotten Sound

You were born into the wrong family
You got categorized from day one
Are you any worse than anyone else is
Or did your genes determine your fate?It is time to learn to get by in your life
To accept where you came from
No sense in fighting back
You are born to be less than the others arePoverty was invented to make smart people simple
The poor class is sustained to make right people wrong
There's no way to educate that unselected mindThe classified brain is destined to be untalented
No way to educate the useless brain
People from below shall breed into a class that stays lowYou were born into the wrong family
You got categorized from day one
Are you any worse than anyone else is
Or did your genes determine your fate?Poverty was invented to make smart people simple
The poor class is sustained to make right people wrong
There's no way to educate that unselected mindThe classified brain is destined to be untalented
No way to educate the useless brain
People from below shall breed into a class that stays low
