Play By Play

Autre Ne Veut

And I said baby
And I said baby
And I said baby
And I said baby
And I said baby, Im all alone
I need you now
Come stay with me so that we can meet somehow
Said baby, your holdmedown is my design
Come stay with me so we can be much higher
I dont wanna be there tonight
You make me whole, you make me crawl
And make me harder
And you, wanna be the one that made me up
You made me love
Dont make me help and make me odder
And you dont wanna be like Im the pain that
You never wanted
Be out, fine, take that
You wait for love, telling me to go, go, go
Dont ever leave me
Youre feeling like you dont mind
Thinking that you want to go
Dont ever leave me
Youre feeling like you dont mind
Thinking that you want to go
Dont ever leave me alone
And this is how you find
Ill make it and you know, know, know
Dont ever leave me
Never leave me out
Never leave me
Dont try to make me
I just called you up to get that play by play
Dont ever leave me alone
I just called you up to get that play by play
I just called you up to get that play by play
Dont ever leave me alone
I just called you up to get that play by play
I just called you up to get that play by play

Dont ever leave me alone
I just called you up to get that play by play
I just called you up to get that play by play
Dont ever leave me alone
I just called you up to get that play by play
I just called you up to get that play by play
Dont ever leave me alone
I just called you up to get that play by play
I just called you up to get that play by play
Dont ever leave me alone
I just called you up to get that play by play
Dont ever leave me alone
