

Never Had A Lady Before

Burton Cummings

I had girls and I had women
But I never had a lady before
I been high and I been flying
But i never been this crazy before
Saying sweet things that I really wanna hear
And it's coming as no surprise
Whatever we got is oh so hard to find
I realize too thata something likea you doesn't come along every day
And I'm turning over part of my mind to you now
I've been loved and befriended
But I never really bled before
I've seen brains and I've seen brilliance
But I never got 'em through my head before
Could have been a week or could have been an hour
Or it could have been a thousand years
When I'm with you baby I'ma losing my track of time
A little bit of me and a little bit of you
Isa telling me to have no fears
I'ma turning over part of my mind to ya honey
Oh, whoo
The notion just can't be denied
Oh, whoo
Feeling only comes when we're side by side
I had girls and I had women
But I never had a lady before
I been high and I been flying
But I never been this crazy before
Coming in my ear anything I wanna hear
And it's coming as no surprise
Whatever we got is oh so hard to find
I realize too thata something likea you doesn't come along every day
And I'm turning over part of my mind now for ya honey
I had girls and I had women
But I never had a lady before na na na
No I never had a lady before
No I never had a lady before
Never had a lady before
Never had a lady before
Never had a lady before
