Driving In The Dark

Saves The Day

Life leaks from you fingertips
Onto sparkling pavement
Having heard the news you stubmle, stuttering, confused
Helicoptors line the sky
Marching men are rolling by
Babies in their baskets blankly stare through space
Ever since I first saw you
I've been blind
Standing in the black frozen night
But I've been driving in the dark towards you
Not stopping 'til I catch the sunlight
In my eyes
Chimpanzees are on tv
Everybody's working waiting for the week to end
Sirens sing over the streets
Ever since I first saw you

Standing in the black frozen night
I've been blind
But I've been driving in the dark towards you
Not stopping 'til I catch the sunlight
And nothing's left to hide
In my eyes
Standing in the black frozen night
Ever since I first saw you
I've been blind
I'm running out of time
Ever since I first saw you
I've been blind
Standing in the black frozen night
But I've been driving in the dark towards you
In my eyes
Not stopping 'til I catch the sunlight
And nothing's left to hide
