

Everyone But You

The Young Veins

A part of you left the room
I am left talkin' to the apple
She comes to me when I dream
I'm tired of counting sheep to see her
I sleep because I need her
And everybody knows it but you A wedding ring is just a thing
That weighs you down and occupies your finger
I know it sounds a little down
But love is all I'm really after She comes to me when I dream
I'm tired of counting sheep to see her
I sleep because I need her
And everybody knows it but you, but you
Everybody knows it but you I hope you're all listening
I'm pouring out my heart for paper
A part of me still believes
That love is all I'm really after She comes to me when I dream
I'm tired of counting sheep to see her
I sleep because I need her
And everybody knows it but you, but you
Everybody knows it but you Everyone but you knows
Everyone but you
Everyone but you knows
Everyone but you
