

Glory Verse

Maps

I heard that now you're callin'
Left it all behind this mornin'
With those blocks, the ones that see you through Like all the times before
You made sure that they saw you
But now you're gonna see this through When you look down
You know you'll see this glory verse
What you found
You'll tend to me as glory verse This world could get you closer
To what you need the most
You'll find this chemistry could move These sounds will never leave you
Will be there to receive you
These sounds, they seem to write themselves When you look down
You know you'll see this glory verse
What you found
You'll tell to me is glory verse Before you leave from here
Before you leave from here
Here is really just a matter of time
Before it happens, yeah
