Strung Out

Life of Agony

Strung out, strung out again
I'm looking for that second chance
I've reached out, I've reached out for friends
I think I know how the story endsIf this world has let you down then leave it
If you're lost among the crowd defeated
If you can't see past your frown and cheated
You're feeling like there must be more to life than thisFace down, face down again
Injected just below the skin
Break out, break out of this
I think I've got the itch againIf this world has let you down then leave it
If you're lost among the crowd defeated
If you can't see past your frown and cheated
You're feeling like there must be more to life than thisIf I gave it all up do you
Do you think I, do you think I survive it
And if I walked right up to you should
Should I greet you or should I lay down and die?And I came full circle with you would you take me?
Take me back in your life and I tried so hard so you'd be
Proud of me, proud of me, proud of me
Proud of me, proud all the timeProud all the time
Proud all the time
Proud all the timeStrung outIf this world has let you down then leave it
If you're lost among the crowd defeated
If you can't see past your frown and cheated
You're feeling like there must be more to life than thisIf this world has let you down then leave it
If you're lost among the crowd defeated
If you can't see past your frown and cheated
You're feeling like there must be more to life than thisStrung out again
I strung out again
Strung out again
Strung out again
Strung out again
