Eclipse

Yngwie Malmsteen

Once we were one, now we're worlds apart
Deep inside you know you are my other heart
My memories seem like yesterday
Can't believe it's all so far awayAll these years, all our tears
Still we sing the same old song
Let's make right, what went wrongThere's no beginning, there's no end
There is no reason to pretend
Crying for help from above
We've got to save our loveThere's no beginning, there's no end
There is no reason to pretend
Crying for help from above
We've got to save our loveYou said to me that we hold the key
Eternal love we give and take
It was meant to beMy love for you was always true
And so we sing the same old song
Let's make right all that went wrongThere's no beginning, there's no end
There is no reason to pretend
Crying for help from above
We've got to save our loveThere's no beginning, there's no end
There is no reason to pretend
Crying for help from above
We've got to save our loveAll these years, all our tears
Still we sing the same old song
Let's make right all that went wrongThere's no beginning, there's no end
There is no reason to pretend
Crying for help from above
We've got to save our love
