New Skeptic

The Fold

hey, what's with the girls with the stars in their eyes screaming blame, love, kisses, tears, and lies. From your lipsticked lips will they ever learn? I'll take it in for a second before we crash and burn.
And we are alright now, but we're feeling tremors
It's like a landslide from the top of the world get up, get up and turn it around. And baby we can get on with it.
It's like a landslide from the top of the world tonight, but hey I'm up for the fight. And lately I'm not sleeping.
sleeping.
Go!
And what's with the fact that I can't relate to this broke down town through a melody? There are streets in this town I don't dare drive down, I chalk it up to a lesson from adolescence.
And we are alright now, but we're feeling tremors
It's like a landslide from the top of the world get up, get up and turn it around. And baby we can get on with it.
It's like a landslide from the top of the world tonight, but hey I'm up for the fight. And lately I'm not sleeping.
sleeping.
it's like a landslide from the top of the world tonight, hey I'm up for the fight. 'cause lately I'm not sleeping.
Landslide!
Don't let this break you, don't let this break you down
It's like a landslide from the top of the world tonight, but hey I'm up for the fight. And lately I'm not sleeping.
sleeping. sleeping.
come on!
