Something Worth Knowing

Sherwood

Lately I've been doing some thinking
I guess that it's small like the last couple years
I never would guess all that it's taught me
And I can't believe that it's brought me hereI'm happy that you know where you're going
I wish I could say of myself that was true
We both pursue something worth knowing
But I may not end with the same thing as youWasn't there something you wanted to say
About all the things that could get in our way?
If I am a martyr, will you be my friend?
If it's all the sameI'm counting the days and counting the dollars
Wondering how much I'm willing to spend
To make us believe this is important
But there's only so long that I can pretendWasn't there something you wanted to say
About all the things that could get in our way?
If I am a martyr, will you be my friend?
If it's all the same, if it's all the sameYou could write me a letter
You're not the only one, you're not the only one
That feels the way that you do
'Cause I feel it tooWasn't there something you wanted to say
About all the things that could get in our way?
If I am a martyr, will you be my friend?
If it's all the sameWasn't there something you wanted to say
About all the things that could get in our way?
If I am a martyr, will you be my friend?
If it's all the same
