# Special Flow

## Julian Smith

My little butterfly
You are just so pretty neat
I like to watch you fly
Oh it's just so nice to see
The way you touch my soul
And the beautiful things you say
I wish we could grow old
And stay in the candlelight everydayIf you really want me
You got to let me know
It feels so good inside me
You got that special flow
Say you and me together
I want the world to know
I love you 'til forever
You got that special flowOh girl you blow my mind
With each and every smile
Your ways are so divine
Come on and spend some time
And don't you know it's true
Oh baby me and you
You know just what to do
Cause I'm so into youIf you really want me
You got to let me know
It feels so good inside me
You got that special flow
Say you and me together
I want the world to know
I love you 'til forever
You got that special flowI just wanna know what's on your mind
What you feelin' baby
You just drive me crazy
Come on now
I said I just wanna know
What's on your mind
What you feelin' baby
You just drive me crazyIf you really want me
You got to let me know
It feels so good inside me
You got that special flow

Say you and me together
I want the world to know
I love you 'til forever
You got that special flowIf you really want me
You got to let me know
Say you and me together
I want the world to knowIf you really want me
You got to let me know
It feels so good inside me
You got that special flow
Say you and me together
I want the world to know
I love you 'til forever
You got that special flow
