

Emergency Procedure (Instrumental)

Ghostface Killah

Doctor X enter the crib, worked on the kid
Created a mask that allowed me to breathe
But couldn't extract the chemicals from my body
Poisonous lethal doses, comatosis
In and out of conscious, drugs is ferocious
The mass release the gas that simmer the soul
So my adrenaline stays level not out of control
I been contaminated, physically altered
Got wrong for doing right, my attitude salted
I'm bitter, I clean up the community
Fuck these New York City cops
I don't need the 'mmunity Fuck the hour one, prowl the doctor on speed dial
Slid to the aisle fixed up the golden child
Exquisite doctor, his work of art
Created a gas mask to save Tony Starks
Fuck the hour one, prowl the doctor on speed dial
Slid to the aisle fixed up the golden child
Exquisite doctor, his work of art
Created a gas mask to save Tony Starks I specialize in telekinesis, recognize the thesis
The leading expert on war, and weaponized diseases
The brilliant Doctor X, no scientist is colder
The master specifically protects you from ebola
Its destruction is impossible, totally irrelevant
The compounds are not found on a periodic table of elements
Adamantium plus Vibranium the fords fills your bill
Will shield your cranium
If anyone would try to place the mask upon their face
The mask corrupts yah
It's designed to match your molecular structure
Plus the goal was to give it a touch of luster
The master eagle [?] adjust to your repulsive thrusters
Busta psychology, the wallaby that adapts to the environment
Thats the [?] technology
But I digress, I must confess
The mass is unequivocally my best invention yet, Doctor X Fuck the hour one, prowl the doctor on speed dial
Slid to the aisle fixed up the golden child
Exquisite doctor, his work of art
Created a gas mask to save Tony Starks
Fuck the hour one, prowl the doctor on speed dial

Slid to the aisle fixed up the golden child
Exquisite doctor, his work of art
Created a gas mask to save Tony Starks
