

Be My Girl

Ott

Won't you be my girl be my girl, I want you in my world forever
Won't you be my girl be my girl, you and I should be together now
I heard it from your friends someone, broke your heart
Now you hide your love away don't hide your love away
You need time to heal all the pain you feel inside
You think that love ain't gonna stay
You know I'll treat you right girl
I'll give you love and understanding
Every day and night girl we can make this last forever
It could last forever

Won't you be my girl be my girl, I want you in my world forever
Won't you be my girl be my girl, you and I should be together now
I will never let you down I will be right by your side
And I want you to believe just want you to believe
Won't you come into my arms I wanna' hold you tight
Say you feel the way feel
You know I'll treat you right girl
I'll give you love and understanding
Everyday and night girl we can make this last forever
It could last forever

Won't you be my girl be my girl, I want you in my world forever
Won't you be my girl be my girl, you and I should be together now
Won't you be my girl be my girl, I want you in my world forever
Won't you be my girl be my girl, you and I should be together
Won't you be my girl be my girl, I want you in my world forever
Won't you be my girl be my girl, you and I should be together
Won't you be my girl be my girl, I want you in my world forever
Won't you be my girl be my girl, you and I should be together
Won't you be girl be my girl
