Let Go

Near Miss

You see this time it goes by fast
The best things in life can't always last
So spend it right it might be your last time
To think to see what's wrong and right
To live to find what's deep inside
It's all apart of your sad lost life
This world isn't good enough for me
Got better things to do
This world isn't good enough for me
Got better things to doSo time is up everyone has had enough
You lost your world, someday you'll lose the girl
It's time to think life isn't something free
You made your bed you better lie in itThis world isn't good enough for me
Got better things to do
This world isn't good enough for me
Got better things to doAnd everything you wanted
And everything you know
And everything you wanted
You just let go
You just let goEverything you need
You just let go
An unfinished dream
Everything you need
It's not what it seems
You just let goAnd everything you wanted
And everything you know
And everything you wanted
You just let go
You just let goAn unfinished dream
Everything you need
It's not what it seems
