Heart On Fire

PowerSteel

And bowl me over black and blue
It's far too hard to say I love you
And take my pulse and hose me down
My heart's on fire
I've said these words a thousand times
The bathroom mirror stopped and smiled
So take my pulse and hose me down
My heart's on fire
Cause when you're standing on your own
And you feel you've got nobody around you
Yeah you know I'll be the one who helps you from your knees
When you're standing on your own
And you feel you've got nobody around you
Yeah you know I'll be the one who helps you from your knees
My heart's on fire

My heart's on fire
I wish you'd never shown me now
It seemed too easy to turn you down
Someone's sleeve to wipe my tears
Is your heart on fire?
Cause when you're standing on your own
And you feel you've got nobody around you
Yeah you know I'll be the one who helps you from your knees
When you're standing on your own
And you feel you've got nobody around you
Yeah you know I'll be the one who helps you from your knees
Yeah you know I'll be the one who helps you from your knees
My heart's on fire
My heart's on fire
So bowl me over black and blue
It's far too hard to say I love you
