

# Without Me

[Kina Grannis](#)

You let me know that I was done  
Put me to rest far away from you  
No words will go between us now  
And you think this will help somehow But if you care i'm open  
And if you need i'll stay a while  
So you can get this off your chest  
Prove to yourself without me is best I don't believe you'd rather go on without me  
That you think this is what you need  
That you're better, that you're better without me Another heartfelt letter  
Followed by signs of your lament  
You say I should be better  
And educate me on my flaws But if you care i'm open  
And if you need i'll stay a while  
So you can get this off your chest  
Prove to yourself without me is best I don't believe you'd rather go on without me  
That you think this is what you need  
That you're better, that you're better without me Now you're coming around here doing what you do  
You're making this hard, me living without you  
Don't you see that it's simple  
Don't you see it's so obvious  
It should be you and me constantly, I can't let you go But if you care i'm open  
And if you need i'll stay a while  
So you can get this off your chest  
Prove to yourself without me is best I don't believe you'd rather go on without me  
That you think this is what you need  
That you're better, that you're better without me
