

# A Year from Now

[Phil Vassar](#)

I'd like to think that I'm alright  
that I'm not empty every night  
without your touch to fill me up And I don't miss your face  
beside me on that pillowcase  
but I still do but I won't reach for you A year from now I'll think about the best of times  
and not the love we left behind  
everytime you cross my mind A year from now I might even smile  
when I see your face and you walk in  
I don't know where and I sure don't know when  
I don't know how I guess we'll see  
so just ask me a year from now Maybe I'll be where you are  
and see us as a shooting star  
That had to fall and that was all And I can finally face the facts  
you ain't never coming back  
and maybe then maybe we can be just friends A year from now I'll think about the best of times  
and not the love we left behind  
everytime you cross my mind A year from now I might even smile  
when I see your face and you walk in  
I don't know where and I sure don't know when  
I don't know how I guess we'll see  
so just ask me a year from now Well a year from now I'll think about the best of times  
and not the love we left behind  
everytime you cross my mind A year from now I might even smile  
when I see your face and you walk in  
I don't know where and I sure don't know when  
I don't know how I guess we'll see  
so just ask me a year from now Yeah I guess we'll see so just ask me  
a year from now whoa a year from now
